

Bulk Hose Best Practice

Presenter's Name: George Stewart –
Sparrows Offshore

26th Nov 2009 at Aberdeen Airport Thistle Hotel

Why was there a need for a review ?

Incidents in Crane / Deck / Vessel / Operations

Lack of procedures / guidelines

Lack of personal responsibility / crew ownership

Examples of Bad Practices

Attachment to Hose Accelerating Wear

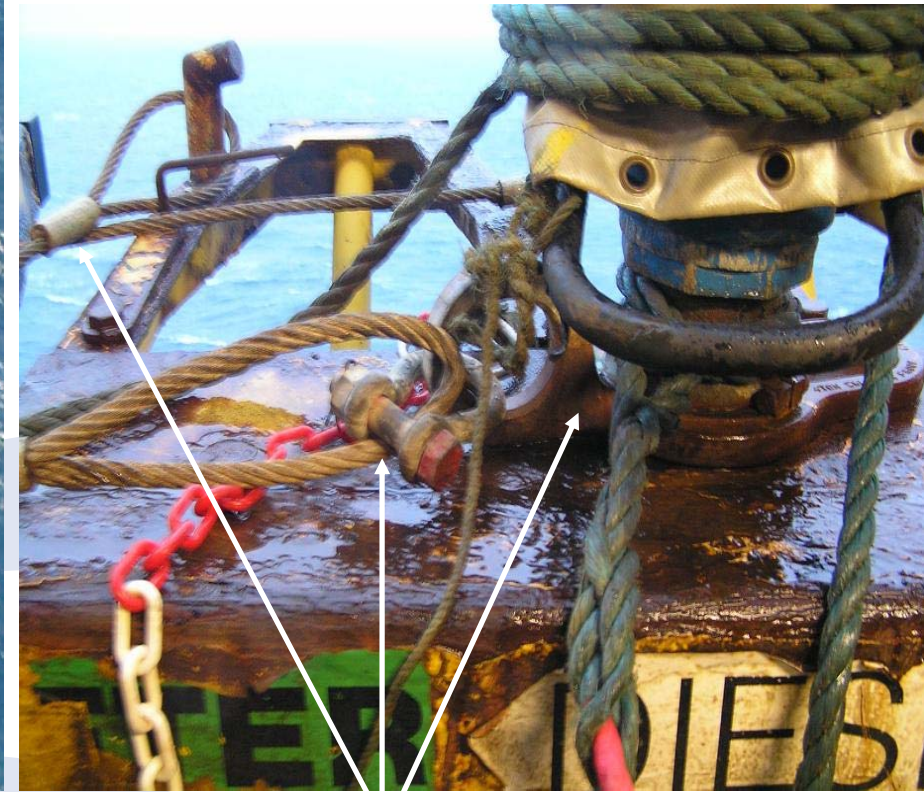

Supporting the hose over the security Pin

Why we need Maintenance

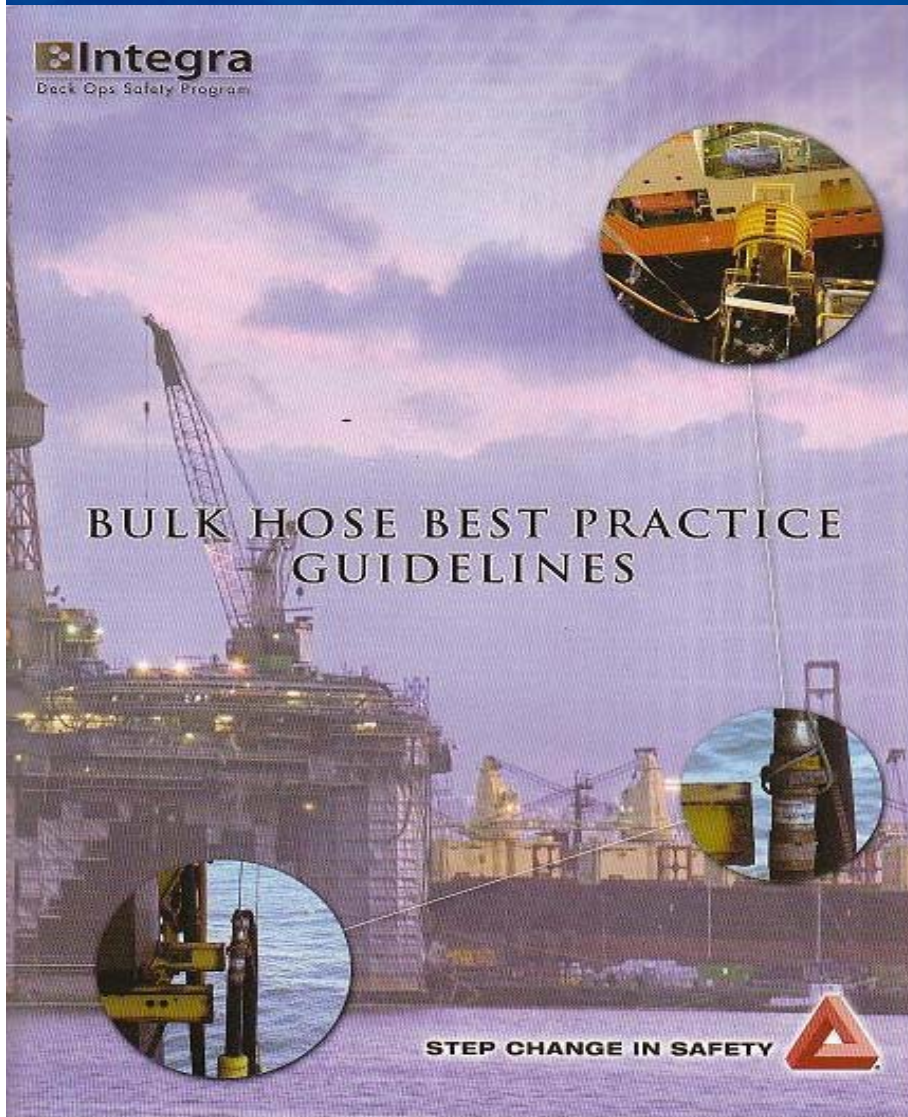

Poor management of hose integrity

Lack of Ownership & Responsibility

How do we achieve Best Practices?

By the introduction of a Best Practice Guidance Documentation.

This document can be found on the Step Change in Safety web site at www.stepchangeinsafety.net

or

Contact Step Change on 01224-577251.

Criteria's this Covers

Pre and After use checks on hoses, slings, shackles, hooky hooks.

Regular inspections / PMR's / Maintenance history

Equipment condition and compliance with clients lifting equipment management scheme.

Progress to date

Circulation of best practice guidance documentation

Robust PMR's being put in place to manage bulk hoses

Personnel have been coached in best practices and hose management

Verification documentation in place to confirm compliance with best practice

Buy in from industry bodies
